LIBRARY OF CALIFORNIA MEMBERS (as of July 20, 2001)

This is an alphabetic list of all Library of California members and their participating libraries. OCLC symbols have been added where applicable, based on OCLC's database of participating libraries.

While every effort was made to assure accuracy in the compilation of this list, there may be errors in how participating libraries are linked to member institutions or how OCLC symbols have been assigned. You are encouraged to contact Christopher Berger in the Library Development Services Bureau of the California State Library, at cberger@library.ca.gov, to report errors or omissions.

This list eventually will be expanded to include additional information for each member institution, such as address, regional library network affiliation, and resource sharing services. Future versions of the list may have uniform entries for libraries, especially city and county public libraries.

In this version, names of libraries have been entered as they appear on the libraries' membership applications to their regional networks, with the result that there is a range of entries, with some public libraries' entries beginning with "City of..." or "County of...". Also, the member institution's name may be different than its participating library's name.

Please use the search feature below if you have trouble locating a specific library's entry, before assuming that the library is not a Library of California member. For additional information about Library of California members, please contact your regional library network or a Library of California staff liaison.

Finding words

You can use the Find command to find a complete word or part of a word in the current PDF document. Acrobat Reader looks for the word by reading every word on every page in the file, including text in form fields.

To find a word using the Find command:

- 1 Click the Find button At or choose Edit > Find.
- 2 Enter the text to find in the text box.
- **3** Select search options if necessary:
- Match Whole Word Only finds only occurrences of the complete word you enter in the text box. For example, if you search for the word *stick*, the words *tick* and *sticky* will not be highlighted.
- Match Case finds only words that contain exactly the same capitalization you enter in the text box.
- Find Backwards starts the search from the current page and goes backwards through the document.
- 4 Click Find. Acrobat Reader finds the next occurrence of the word.

To find the next occurrence of the word:

Do one of the following:

Choose Edit > Find Again or Use the F3 Key
